### DETAILED ACTION

1. This action is in response to the application filed December 10, 2001.

#### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to a dual gate oxide high voltage semiconductor, classified in class 257, subclass 367.
  - II. Claims 13-20, drawn to the method for forming a dual gate oxide high voltage semiconductor, classified in class 438, subclass 149.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The product can be made by LOCOS or PETEOS.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was placed to Steven R. Biren on October 9, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
